

# WELCOME TO CATALINA ISLAND MARINE INSTITUTE

## MORE THAN A FIELD TRIP!

We are excited that your child will be attending CIMI! Our goal is to make their trip one that they will remember for the rest of their life!

Catalina Island Marine Institute (CIMI) is a STEM-based, outdoor science school that provides exciting marine science education for 4th-through 12th-grade students at two locations on Catalina Island — Toyon Bay and Fox Landing.

Individual exploration and discovery are at the heart of CIMI's educational philosophy. In addition to its academic value, a major benefit of attending CIMI is the 'camp experience.' While camp is fun, exciting, and educational, it also teaches children practical life skills. By working in small teams to accomplish goals, they learn to get along with others in a group living situation and forge stronger friendships. The very nature of the experience encourages personal responsibility, initiative, and independence. Camp is an opportunity to develop character as children unplug, leave their comfort zones behind, and connect with the world around them.
